Independent Diagnostic Testing Facility (IDTF)

Coding Guidelines**Desk and Site Reviews**

All new IDTF applications shall receive (1) a thorough desk review, and (2) a mandatory site review prior to the carrier's enrollment of the applicant and issuance of a billing number. The general purpose of both reviews is to determine whether the information listed on Attachment 2 of the CMS-855B is correct, verifiable, and in accordance with IDTF regulatory and manual requirements.

Site Visits for Mobile Units and Electronic Monitoring Services

Mobile units are required to list their geographic service area. They can be site visited by the following methods: 1) The mobile unit may visit the office of the site reviewer, or 2) The site reviewer can obtain an advance schedule of the locations the IDTF will be visiting and conduct the site visit at one of those locations.

Transtelephonic and electronic monitoring services (e.g., 24-hour ambulatory EKG monitoring; pacemaker monitoring and cardiac event detection) should be classified as IDTFs and must meet all IDTF requirements. These entities require a supervisory physician who performs general supervision. Final enrollment of a transtelephonic or electronic monitoring service as an IDTF requires a site visit.

Interpreting Physicians

An Independent Diagnostic Testing Facility (IDTF) is not restricted to billing only the technical component of diagnostic services. In certain situations, an IDTF can bill for both the technical component of the diagnostic test and interpretative services. This approach is referred to as billing "globally". The interpretative services must be performed by a licensed practitioner who is allowed to perform the service.

If the interpreting practitioner is an employee of the IDTF, the IDTF must submit a Reassignment of Benefits, Form CMS-855R, which has been signed by the practitioner, in accordance with the Medicare Program Integrity Manual (PIM) Chapter 10, sections 4.19 and 7. If the interpreting practitioner is a contractor performing the interpretation on the premises that the IDTF owns or leases, the IDTF must submit a Reassignment of Benefits, Form CMS-855R, which has been signed by the practitioner, in accordance with PIM Chapter 10, sections 4.19 and 7. In no instance may a group of physicians reassign its benefits to the IDTF. Only individual practitioners may reassign their benefits.

When enrolling or updating information, the IDTF shall list all physicians for whose diagnostic test interpretations it will bill. This includes physicians who are providing purchased interpretations to the IDTF (in accordance with CMS Manual System, Pub 100-04, Medicare Claims Processing Manual, Chapter 1, Section 30.2), as well as physicians who are reassigning their benefits to the IDTF. The carrier will ensure and document the following:

- *All physicians listed are enrolled in Medicare.*
- *All interpreting physicians who are reassigning their benefits to the IDTF have the right to do so.*
- *All required CMS-855R forms have been submitted.*
- *The interpreting physicians listed are qualified to interpret the types of tests (codes) listed. [In accordance with this CMS requirement (CMS Manual System, Pub. 100-08, Medicare Program Integrity Manual, Chapter 10, Section 4.19.3),*

FCSO Medicare requires that the interpreting physician for a test billed by the IDTF meet the same qualification requirements as the supervising physician for that IDTF test as listed in the 'Credentialing Matrix'.]

Note: The applicant cannot bill globally for interpreting physicians not listed.

If an interpreting physician has been recently added or changed, the new interpreting physician must have met all of the interpreting physician requirements at the time any tests were performed.

Off-Site Interpretations

If an IDTF wants to bill for an interpretation performed by an independent practitioner off the premises of the IDTF, it must meet all instructions identified in the CMS Manual System, Pub 100-4, Medical Claims Processing Manual, Chapter 1, concerning purchased interpretations. In this scenario, there is no reassignment of benefits because the purchaser of the test is also considered the supplier of the test.

When the technical component of a test is performed by the IDTF and the interpreting practitioner is the practitioner who ordered the test, the IDTF cannot bill for the interpretation. The interpreting practitioner must bill the interpretation since the IDTF cannot bill the interpretation when the interpreting physician is the referring physician.

Purchased Diagnostic Tests and Jurisdictional Pricing

Services that are reimbursed under the Medicare Physician Fee Schedule (MPFS) are reimbursed by the payment locality where the service is furnished and by the zip code. Effective for claims received on or after April 1, 2004, carriers must use the zip code of the location where the service was rendered to determine carrier jurisdiction over the claim and the correct payment locality. When a physician, practitioner, or supplier furnishes services in payment localities that cover more than one carrier's service area (e.g., the provider has separate offices in multiple localities and/or multiple carriers), separate claims must be submitted to the appropriate carrier for processing.

Effective April 1, 2004, providers may not submit a global billing code on paper or electronic claims when one component of the service has been purchased. Only one service facility location (name, address and zip code) can be indicated in item 32 on the CMS-1500 form. Claims received with global services will be returned as unprocessable.

Effective January 25, 2005, suppliers (including laboratories, physicians and independent diagnostic testing facilities [IDTFs]) must bill their local carrier for all purchased diagnostic tests/interpretations, regardless of the location where the purchased service was rendered.

Purchased Technical Components

A physician may bill for the technical component of a diagnostic test that he/she purchased from another physician, medical group or supplier. However, in order to purchase a diagnostic test from another physician, medical group, or supplier, the purchaser must perform the interpretation (professional component). Additionally, the physician or supplier that furnished the technical component must be enrolled in the Medicare program.

Purchased Interpretations

A person or entity that provides diagnostic tests may submit the claim, and (if assignment is accepted) receive the Part B payment, for diagnostic test interpretations which that person or entity purchases from an independent physician or medical group if:

- *The tests are initiated by a physician or medical group which is independent of the person or entity providing the tests and of the physician or medical group providing the interpretations;*
- *The physician or medical group providing the interpretations does not see the patient; and*
- *The purchaser (or employee, partner, or owner of the purchaser) performs the technical component of the test. The interpreting physician must be enrolled in the Medicare program. No formal reassignment is necessary.*
- *The purchaser must keep on file the name, the provider identification number and address of the interpreting physician.*

Note: This does not remove the requirement that when an entity either purchases an interpretation or a test, they must perform the other component in order to be paid for the purchased component.

In order to price claims correctly and apply purchase price limitations, global billing is not acceptable for claims received on the Form CMS-1500 or on the ANSI X12N 837 electronic format. Each component must be billed as a separate line item (or on a separate claim).

Effective for claims with dates of service on or after January 25, 2005, suppliers (including laboratories, physicians, and IDTFs) must submit claims for all purchased diagnostic tests/interpretations to their local carrier, regardless of the location where the purchased service was furnished.
